High Voltage Services

Flint's High Voltage division offers project management, construction and maintenance of generating facilities, substations and transmission lines through several of our Western Canadian operating centres. Flint provides safe, cost-effective services to a variety of power industries including: regulated utilities, industrial and municipal-owned electric utilities, oil and natural gas producers, power generators, and wind farms.

GENERATING FACILITIES

- Construction
- Civil work—surveying, earthwork, concrete, screw-piles
- Structural steel fabrication and erection
- Mechanical fabrication and installation
- Electrical and instrumentation

TRANSMISSION LINES

- Construction and maintenance
- ROW clearing/brushing
- Civil work—surveying, earthwork, concrete, screw-piles
- Tower erection—wood, mono-pole and lattice structures

SUBSTATIONS

- Construction, testing, and maintenance
- Turn-key project management and services from design to energization

EQUIPMENT INSTALLATIONS

- Power transformers, circuit breakers, and capacitor banks

INSTALLATION SERVICES

- Civil work—surveying, earthwork, concrete, screw-piles
- Oil containment equipment
- Wood and steel structures
- Pipe and wire buswork
- Grounding grids, grounding rods and wells
- Control cables and support systems
