Building Leaders. Driving Success.

You can be here

"Here" could be at any one of Flint Energy's 60 locations. You'll find us in many of the major oil and natural gas basins throughout North America.

About Flint

We're an energy services leader across North America providing a wide range of integrated products and services, including production services; field construction; oilfield transportation; process equipment design and manufacturing; tubular management services; and plant management and maintenance services. We are a preferred provider of infrastructure construction management, module fabrication, and maintenance services for upgrading and production facilities in Alberta's oil sands sector.

More than a century old, Flint is a well diversified services company with more than 60 strategic locations in the oil and natural gas producing areas of North America, from Inuvik in the Northwest Territories to Mission, Texas near the Mexican border. We are in many of the hottest unconventional energy plays in North America, including the Marcellus shale in the Appalachian Basin of Pennsylvania and Virginia, the Bakken shale in Southern Saskatchewan and North Dakota, British Columbia's Deep Basin gas and northern Alberta's oil sands. We are where the industry is – today!

Why You Should Choose Flint

Zero Injury Workforce

Flint is an industry leader in workplace safety. Our safety culture continuously demonstrates that "People are Number One 24/7". We walk the talk: employees and management work together in an active effort to promote workplace safety. One of our core values is people first – and we are committed to protecting our most valued asset. Our safety target is a zero injury workforce.

We're committed to ensuring that Flint employees have the tools to protect themselves, regardless of where they are working. Our comprehensive, proactive Safety Management System integrates the successes, innovations, safety fundamentals and benchmarking practices and programs developed by our entire organization and backed by a committed corporate safety team.

Flint's Oilfield Services division handles all types of oilfield equipment moves in the most challenging conditions. We operate one of the largest and most diverse oilfield transportation fleets in North America.

Training and Development

Our training and development programs are one of the key reasons why candidates choose Flint as their employer of choice. We provide our employees with all of the tools they need to grow and excel both personally and professionally. Flint offers outstanding apprenticeship and management training, along with our Values Based Leadership training program that is unmatched in the industry. We also offer various forms of educational assistance to employees who are interested in further professional development through external programs and professional/industry associations. Our variety of training programs and development initiatives allow employees to take charge of developing their careers. At Flint, we take care of our employees and understand the importance of investing in their futures.

Benefits

Flint's competitive compensation package is just the beginning. We understand the importance of balancing work, family and lifestyles and have created a number of innovative ways to enrich our employees' lives. There is an option to "purchase" additional time off and to stretch annual paid vacations and statutory holidays. Or, our Earned Days Off program lets you develop an alternative work schedule to "earn" additional days off.

We've got employees covered with a full range of benefits programs including an employee assistance program, health care spending account, dental, vision care, life insurance, short- and long-term disability programs and additional options that assist with a variety of life events. You can choose the optional benefits that are most meaningful to you.

Taking care of your future is important too. Flint makes contributions to pension plans and RRSPs with no required matching of dollars by employees.

To make sure we've covered all the bases with employees, we regularly conduct employee surveys to find out what programs are most effective.
