

Safety Services

Flint's Safety Services specializes in onsite safety personnel, training, safety services, and safety rental equipment. We support safe work-environments, and from our eight locations across Alberta and British Columbia, are able to work with your most valued asset—your employees. We believe that all occupational injury, illness and property damage is preventable, and through the proactive management of risk and at-risk behaviours, injuries and losses can be reduced and eliminated from your organization. Essentially it is about teaching people about the tools and resources necessary to effectively manage their risk and the safety of others around them.
