

# Well Site Equipment Manufacturing

Flint Process Systems Ltd., a subsidiary of Flint Energy Services Ltd., is a world-class well site equipment manufacturer offering oil and natural gas customers in the Western Canada Sedimentary Basin the highest quality in surface production equipment. Our state-of-the-art 50,000 sq. ft. fabrication plant is strategically located in Halkirk, Alberta where Flint's products are designed and manufactured to conform to provincial, federal and international regulatory codes, safety acts, and customer specifications. A dedicated project manager oversees design and fabrication from start to finish, and our products undergo comprehensive functional testing prior to shipment. We ensure that our products meet the highest quality standards and performance.

## SURFACE PRODUCTS

- Separator packages
- Cyclones
- Line heaters
- Blowcase units
- Slug catchers
- Combination units
- Customized equipment
- Meter-run packages
- Vertical and horizontal inlet header packages
- Dehydration packages
- Treaters and free water knock outs
